

## **CRP NOTE #94**

**January 3, 2000**

This note distributes the seeding mixtures approved for use in CRP sign-up 20 for scoring N1 (A) points, and the guidance for scoring N1 (B), Threatened and Endangered Species.

Copies of the seeding mixtures from previous sign-ups are to be retained and used with contracts from those sign-up periods. Producers with contracts accepted in the 18<sup>th</sup> CRP sign-up may be given the option to plant an equivalent mix from the approved 20<sup>th</sup> sign-up seeding list, as long as the mixture equals or exceeds the EBI score awarded under N1(A). Producers accepted in CRP 20 do not have the option of using seeding mixtures from CRP 18.
